

## REMARKS

The change to the specification is being made to clarify the reason why the modification shown in Figure 3 is better able to radiate lower frequencies. Applicants respectfully submit that although the added statements were not originally present in the application, no new matter is presented by the addition of the statements. This is so because one of ordinary skill in the radio frequency pulse generating art would inherently know the recited specific reasons why the modification is better able to radiate lower frequencies. Nevertheless, Applicants would like these statements added for clarification purposes.

An Information Disclosure Statement is also being filed concurrently herewith that sets forth a list of US Patent references for consideration.

Respectfully submitted,

By: William A. Blake
